MINE AND PROSPECT; FURNACE AND MILL.

A DAY'S PAYMENTS ON LOCAL DEALS

Honerine West Checks Out on Its Acquisitions as Did the Ohio of Bingham.

The Paymaster for the Honerine West company yesterday dealt out the second payment on the Monroe group of mines at Stockton, this reducing the balance on the acquisition to about two-fifths of the sum involved. The group consists of four locations on the main zone at Stockton and is traversed by ledges identical with those from which the wealth of those diggings has citherto come. Manager Richmond says that the sinking of the main shaft asys that the sinking of the main shart on the Jessie claim, now being pros-pected for the likeliest collar at which to begin, will commence in a few days, the undertaking to be equipped with everything that shall facilitate the work. To this end a sinking fund has already been provided by the originators of the splendid undertaking, which begins with over 200 acres as an asset, and the work will be prosecuted without interruption until results that in-spired the organization of the company shall have been achieved and West Honerine is made to contribute to the world of wealth.

ASSAYS ON FIRST LOT OF HONERINE ORES

The first consignment of ore from the properties of the Honerine Mining company under the present regime was delivered at the furnaces of the American Smelting and Refining company yesterday, on controls showing as much as 55.7 per cent copper, 13 ounces silver and 40 cents gold per ton, an average that cannot but gratify the manage-ment while enthusing the shareholder. Of the same class of rock the management has eight carloads now at the sampler, with three more in transit, while the initial lot of concentrates is now waiting on the sampler. Of the mill, Manager Snyder says it is doing its work most satisfactorily and that the tonnage is being rapidly increased.

A sounding yesterday of the "outside shaft," which was dropped down to a depth of 365 feet that an upper tunnelheading might be established showed that the water had receded no less than seventeen feet since the tunnel passed it. Certainly this recession of the waters means an early draining of the zone into which it is again forging its way, and is as gratifying as any one of the chapter of strikes that has char-acterized the reopening of the Honerine

YAMPA MATTE AGAIN ON THE OPEN MARKET

The management of the Yampa smelter in Bingham canyon continues to come to market with a most desirable product from that plant, lot seven hav ing reached the valley furnaces yesterday, this consisting of two carloads. While the metallic contents of the matte are not revealed, it was said that the fine iron excess in which is con-tained the copper, gold and silver, makes it the more eagerly sought by the valley smelters. Meanwhile the management of the Yampa is promised an increased tonnage of ore by the Cop-per Belt railway, and its output the present month promises to show a most gratifying increase. Of physical condi-tions underground it can be said that Superintendent Craig has them well in hand and that he is prepared to re-spond with a tonnege equal to any coming out of the camp of copper.

A PLEASANT DISTRIBUTION FOR COLUMBIA INTERESTS

The former owners of the Columbia group of mines at Bingham partook of another \$50,000 spread yesterday, the remittance which made it possible coming from the Ohio Copper company by whom their holdings were some time ago acquired, and that are now being made to reimburse the new crowd. In-deed, developments since the deal was consummated have demonstrated what it is possible to accomplish at Bingham with an adequate fund with which to rip open its ledges and get into the zone, while the mill has shown how easy it is to derive commercial results from the second-class ores. The season at the Ohio opens with many assurances of good big results, while the payment vesterally reduces the belonger payment yesterday reduces the balance on the transaction to \$57,000, while in-creasing the total already dealt out to the shareholders to \$150,000.

H. B. Con. Payment.

While the \$25,000 payment on the Highland Boy Con. mines at Bingham by the Utah-Apex company of Massa-chusetts had not reached the vendors at the close of bank yesterday, it is reasonably certain that it is in transit and that it will be placed to the credit of the deal before the time limit is reached. Indeed, there is no danger of the territory escaping, as it has proved up more than satisfactorily since the purchasing company acquired posses-sion and is ready to respond with rock of good quality whenever the signal While no information concern-result of the shareholders' meeting the result of the shareholders' meet-ing in the East has come, it is the im-pression that the factions have buried

Ore and Bullion.

Ore and Bullion market the day's settlements amounted to \$79,390, McCornick & Co. reporting them as they follow: American bullion, \$89,209; gold, silver, lead and copper ores, \$49,100. In the metal market silver was again unruly and settled down to 56% cents an ounce, while lead remained stationary at \$3.50 per hundred pounds, and casting copper at 11% cents a pound.

Boston Copper Market. Special to The Tribune.

tendency was to bid prices up whenever there was an opportunity. In the late trading commission houses appeared as buyers and prices showed a sharp advance, which centinued until the closing, this being at the best prices of the day, Daly West was weak in the early trading on the execution of seiling orders at the market; a recovery followed. THE DAY ON 'CHANGE WAS PROVOKINGLY DULL

The day on the mining exchange closed with the delivery of 24,650 shares of stock, for which \$2149.60 was received, and with the conditions generally unchanged. Yankee Con. on which the Indians had relied for scalps, appeared to have spent its energies in the first heat, in which it advanced to 13 cents, the shares receding from that point and closing on a transfer at 51%c, while, Con. Mercur, that brought file at the merning session, executed an order for 1100 at 62 during the afternoon. A bid of \$30.60, the best to be had for Daily West, was contemptuously rejected by the leviathan of the Park, whose shareholders were just then pocketing the March dividend, while Daily-Judge was marked down to an offering at \$4.40, with Century recording a sale at 78c. Lower Mammoth was quite actively dealt in around 37%c and Little Chief around 4 cents, with La Reine filling orders up to 51%c and Ajax at 5c. Grand Central among whose shareholders \$25,000 was being divided during the day, was marked up to \$4.50, with \$4 the best to be had for Onlario, and \$1.85 for Daily. Butler-Liberal did some business at 16%c, and Tetro at \$35%c, while Wabash was freely released around small fractions, the day closing on the following market. vanced to 53 cents, the shares receding

NAST MILLING ORES TO BE TREATED ON GROUND

The large volume of second-class ore in the old Nast group of mines at Binghan is to be made a source of revenue the present year, and to that end a battery of jigs is now being installed in Mudd gulch, which promises a supply of water guich, which promises a supply of water. For this purpose a new building is now being hurried by Henry M. Adkinson, manager for the New England company by which the Nast group is owned, and with at least fifty tons of ore going through the plant daily the financial status of the enterprise will have been materially promotted. The Nast group has long been looked upon as one of the likeliest at Bingham, and in its career hat been productive of not a little wealth.

JAPANESE MINERS FOR SOUTHERN DIGGIN'

Special to The Tribune CITY OF MEXICO, March 15-Th war with Russia will not interfere wit the importation of the Japanese mir laborers contracted for some time ago Michigan 4.50 by the Japanese-Mexican Commercial company of this city. Advices from Japan to that effect have been received The contracts call for 500 Japs for the contracts can for own Japa for the copper mines of the Rothschilds in Lower California, and 200 for the coal mines of the Mexican Coal and Coke company in the State of Coahulla. It is believed, however, that the war will prevent the making of new con-tracts for Invarience workmen. It was tracts for Japanese workmen. It was the intention of the Japanese-Mexican company to import several thousand Japs during the present year.

MAJESTIC VOTING

een distributed among the old work

The "voting trust committee" which was deposited the shares of the Majestic Mining company on November 10th last and through which an effort was pade to relieve the financial needs of the undertaking, has come forth with an address to the stockholders after thorough investigation of all interests, in which it

TRUST GIVES UP

the financial condition of the corporation. When the change in the board of directors was made, its debts approximated \$250,000, of which sum about \$100,000 was past due end the remainder will mature within a

'Upon inquiry, the lowest estimate that "Upon inquiry, the lowest estimate that the committee could procure as to the amount of money and length of time absolutely necessary to pay off the indebtedness and develop the properties so that the smelter could be put and kept in blast, was \$500,000 and a year's time. The committee did its best to secure this sum of money through various parties, but without success, and it now desires to state that it is unable to finance the company in its present condition upon advantageous terms as an independent corporation.

"The stockholders who have deposited their stock must now decide whether they desire to dissolve the voting trust committee and take charge of the property themselves, or, the afternative, whether they will authorize the committee to accept an offer made to it by another corporation for the transfer, sale or exchange of the Majestic stock deposited with the committee for the stock of this new corporation. These two propositions will have to be voted upon at a meeting of the depositing stockholders, at which meeting the proposition last above referred to will be presented to the depositing stockholders in due form, giving all of the conditions and such other information as may be necessary to enlighten them so that they can act intelligently.

"The committee would like in this circular letter to embody the terms of the proposition for the sale or exchange of the Majestic stock deposited with it to another corporation, but at this time the details have not been arranged with sufficient positiveness to allow of such proceeding.

"However, inasmuch as time is most The stockholders who have deposited

ceeding
"However, inasmuch as time is most
essential, the committee decided not to
wait for the adjustment of all details, but
to issue a call for a meeting of the depositing stockholders. In the belief that
before that time all the terms of the
proposition will have been definitely positing stockholders, in the belief that before that time all the terms of the proposition will have been definitely agreed upon. In the meantime, the committee as soon as possible, will present to each depositing stockholder the proposed plan, together with an agreement for him or her individually to execute. This is done for the convenience of those who cannot personally attend, and because, on account of the fallure of the voting trust agreement to so provide, depositing stockholders cannot be represented at the meeting by proxy.

"We therefore give you notice that there will be a meeting of the stockholders who have deposited their stock with this committee, on March 28, 1991, at 11 o'clock in the morning, at the office of the company, No. 11 William street, in the city of New York."

The address concludes with the signatures of A. G. Loomis, George E. Kelth, Howard C. Bradley, Harmon G. Howe, James H. Knight and Charles F. Street.

The corporation referred to and in which the Majestic has been afforded an opportunity to enter is, of course, the Monarch Mining company recently organized.

ACTIVE MOVING OF BINGHAM ORES

Needs of Furnaces and Tables Again Being Supplied by the Copper Belt Railway.

Along the circultous pathways of the Copper Belt road at Bingham ores were again moving from every connection last night, and with the clearing of the skies and moderation of the weather at amp comes assurance that interruplons are at an end. With a crew of over orly men borrowed from the Boston Con the branch from that bonanza has been reballasted, with the output of the been reballasted, with the output of the milnes to recover the normal tonnage in a short time, while the Utah Copper company is now being supplied with 200 tons daily, this volume to be increased in a short time. From the Columbia group ores are again being forwarded to the Ohlo Copper company's milli with assurances that there shall be no more intermediate. shall be no more interruptions, while some ore is coming from the Commersome ore is coming from the Commercial group to Bingham Con, furnaces. Meanwhile the builders at Lima, O., are rushing work on the third locomotive for use on the line, while the crippled machine which recently went into the Rio Grande's shops is about ready to get into harness again, with the No. 1 to make its escape, reconstructed and "good as new" from Silver Bros. from works. With these machines on the tracks the management feels that every need will be supplied with dispatch, and while the recent interruption has inconvenienced the customer, it will have soon been the customer, it will have soon been

President Bayly of the railway, whose liberal policy in the operation of the line promises to render it of so much service to the producers of the camp, will arrive from the East this afternoon to remain some time, and before his de-parture will have adjusted every need, no matter how minute.

SIXTH FURNACE NEARLY READY FOR THE FIRE

The furnaces at the United States

smelter, of which five are now in operation, are making a new record for the plant the present month, while to improve upon present conditions the sixth is nearly ready for the fires, and should go into commission by the middle of April. With the present battery, however, Superintendent Hazleton is reduc-ing 800 tons of ore daily, with the out-put of bullion containing copper, gold and silver, correspondingly increased, and the crop for March will disclose a larger total than at any period since the plant went into commission. Mean-while work on the lend furnaces is pro-gressing steadily, while the volume of ore from the company's mines con-tinues to come as the management of the smelter requires. Work, per tooth Fillings

RUMORED CHANGE AT FARMINGTON OIL BORE

While the slient policy of the management makes it difficult of verification, a story of oil-bearing sand and shale in the Guffey & Galey bore at Farmington was exploited with none the less fervor by the talent which is relying on the oil and gas field for the next boom. A messenger was dispatched to the field by local interests during the afternoon, but it appears that if he succeeded in procuring any information it was to be esteemed "confidential." While the depth of the bore has not been revealed by the man-agement, it is the opinion of the oracles along "the street" that it has passed the 1500-foot station. Certainly it has been in the "solid formation" for some time, and a change is expected on any

NEW CROP OF SNOW.

Four Feet Added to the Visible Supply at Mines of Alta.

With the reopening of communication by wire came news from Alta that the recent storm had added at least four feet to the crop that had previously fallen, and that for the time being the road between camp and the valley smelters has been closed. However, ores are being forwarded under contract, and the reopening of the thoroughfare by the haulers will begin as soon as the prophet assures them that the storm is spent. One of the men engaged on construction at the Colum-bus Con. who came down from camp on Monday night says he was required to make the trip on snowshoes. Mean-while operations under ground are progressing with most gratifying results, and the reopening of the road will be characterized by the moving of ton-nages of unusual weight.

AT THE DALY WEST.

Nothing, Says ar Official, to Justify the Flattening Out.

After a dividend of 65 cents a share, or \$117,000, had been passed around yesterday there was remaining in the treasury of the company over \$300,000, and yet the shares have not been as weak as were they on the eve of the Quincy's absorption. The condition is certainly without apparent cause, whatever, said an official of the company, and while not a member of its house-hold deplores the declines, it has, said the gentleman, never been its policy to boost. It was said yesterday by a local broker who had been digesting the con-tents of a letter from the East, that the weakness of the shares on that market was due to reports that certain large interests were about to unload. This, however, is an opinion. At the mines the normal tonnage of the first-class and milling ores is coming to the sur-face, while of conditions underground, face, while of conditions underground, it is said they have never been more gratifying.

Ernest Hamberger, assistant manager of the Daly West, left for that property at Park City yesterday morning. Manager MacVichle of the Bingham Con-left for the Eagle & Hue Bell of Tintic to inquire into developments yesterday morning.

Frank Shepard, manager of the Denver Engineering works, is in the city, com-ecting for contracts on the Newhouse con-entrator.

Owing to the rivalry over Cactus con-tracts the bids will not be opened for about forty-eight hours, said Manager Bettles last night

The Utah of Deep Creek has another lot of sliver and lead ore in transit, with another \$100 distribution to be made in a short time.
